

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of either the World Health Organization or the United Nations Environment Programme.

Environmental Health Criteria 14

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur oxides and Suspended Particulate Matter
9. DDT
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon monoxide

ULTRAVIOLET RADIATION

Published under the joint sponsorship of the United Nations Environment Programme, the World Health Organization and the International Radiation Protection Association

World Health Organization
Geneva, 1979

CONTENTS

ENVIRONMENTAL HEALTH CRITERIA FOR ULTRAVIOLET RADIATION	
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER STUDIES	10
1.1 Summary	10
1.2 Recommendations for further studies	12
1.2.1 Measurement of ultraviolet radiation from natural and artificial sources	12
1.2.1.1 Measurement devices	12
1.2.1.2 Monitoring of natural sources	13
1.2.1.3 Monitoring of artificial sources	13
1.2.1.4 Development of personal monitoring devices	13
1.2.1.5 Improvement of high intensity sources	13
1.2.2 Effects of UV-B, UV-A, and visible light on cells and their constituents	14
1.2.3 The relationship between ultraviolet radiation and skin cancer	14
1.2.4 Epidemiological studies of skin cancer and ultraviolet radiation deficiency in man	15
1.2.4.1 Non-melanoma skin cancer	15
1.2.4.2 Malignant melanoma	15
1.2.4.3 Identification of populations with an increased risk of skin cancer	15
1.2.4.4 UVR deficiency	15
1.2.5 Studies of the interaction of ultraviolet radiation and environmental chemicals	16
1.2.6 Studies of beneficial effects	16
1.2.7 Control measures and protection	16
1.2.7.1 Control measures	17
1.2.7.2 Sunscreen preparations	17
1.2.7.3 Behavioural modifications	17
2. PROPERTIES AND MEASUREMENT OF ULTRAVIOLET RADIATION	17
2.1 Sources	17
2.1.1 Solar radiation — the biologically active UVR spectrum	17
2.1.1.1 Influence of stratospheric constituents	18
2.1.1.2 Influence of clouds, haze, and smog	18
2.1.1.3 Amount of sea level solar ultraviolet radiation in the biologically active UVR spectrum	20
2.1.2 Artificial sources	21
2.1.2.1 Gas discharge arcs	21
2.1.2.2 Fluorescent lamps	22
2.1.2.3 Carbon arcs	22
2.1.2.4 Quartz halogen lamps	22
2.1.2.5 Oxyacetylene, oxyhydrogen, and plasma torches	23
2.2 Detection and measurement of ultraviolet radiation	23
2.2.1 Units and conversion factors	23
