

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of either the World Health Organization, the United Nations Environment Programme, or the International Radiation Protection Association.

Environmental Health Criteria 16

RADIOFREQUENCY AND MICROWAVES

Published under the joint sponsorship of the United Nations Environment Programme, the World Health Organization and the International Radiation Protection Association

INVENTARIO N. 19

World Health Organization
Geneva, 1981

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds

CONTENTS

ENVIRONMENTAL HEALTH CRITERIA FOR RADIOFREQUENCY AND MICROWAVES	8
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER STUDIES	10
1.1 Summary	10
1.1.1 Physical characteristics in relation to biological effects	10
1.1.2 Sources and control of exposure	11
1.1.3 Biological effects in experimental animals	12
1.1.4 Power density ranges in relation to health effects	13
1.1.5 Exposure effects in man	13
1.1.6 Health risk evaluation as a basis for exposure limits	14
1.2 Recommendations for further studies, exposure limits, and protective measures	14
1.2.1 General recommendations	14
1.2.2 Measurement techniques	15
1.2.3 Safety procedures	15
1.2.4 Biological investigations	16
1.2.5 Epidemiological investigations	16
1.2.6 Exposure limits and emission standards	17
1.2.6.1 Occupational exposure limits	17
1.2.6.2 Exposure limits for the general population	17
1.2.6.3 Emission standards	17
1.2.6.4 Implementation of standards	17
1.2.6.5 Other protective measures	18
1.2.6.6 Studies related to the establishment of limits	18
2. MAGNITUDE OF EXPOSURE TO MICROWAVE AND RF RADIATION AND SOURCES OF CONCERN	18
3. PROPERTIES OF MICROWAVE AND RADIOFREQUENCY (RF) RADIATION	19
3.1 Units of radiation	21
3.2 Other physical considerations	22
4. SOURCES AND CONDITIONS OF EXPOSURE	23
4.1 Natural background sources	23
4.2 Man-made sources	25
4.2.1 Deliberate emitters	25
4.2.2 Sources of unintentional radiation	32
4.3 Estimating exposure levels	35
4.3.1 Far-field exposure	35
4.3.2 Near-field exposure	35
4.4 Facilities for controlled exposure	36
4.4.1 Free space standard field method	37
4.4.2 Guided wave methods	38
4.4.3 Standard probe method	39
5. MEASURING INSTRUMENTS	40
5.1 General principles	40
5.2 Types of instruments in common use	41

Publications of the World Health Organization enjoy copyright protection in accordance with the provisions of Protocol 2 of the Universal Copyright Convention. For rights of reproduction or translation of WHO publications, in part or *in toto*, application should be made to the Office of Publications, World Health Organization, Geneva, Switzerland. The World Health Organization welcomes such applications.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.
