

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organization, or the World Health Organization.

## Environmental Health Criteria 20

# SELECTED PETROLEUM PRODUCTS

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organization, and the World Health Organization

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA Series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part I
7. Photochemical Oxidants
8. Sulfur oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide

World Health Organization  
Geneva, 1982

INVENTARIO N. 23

# CONTENTS

ENVIRONMENTAL HEALTH CRITERIA FOR SELECTED PETROLEUM PRODUCTS .....	8
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER STUDIES .....	11
1.1 Summary .....	11
1.1.1 Properties and analytical methods .....	11
1.1.1.1 Properties .....	11
1.1.1.2 Analytical methods .....	11
1.1.2 Sources of environmental pollution .....	12
1.1.3 Environmental concentrations and levels of exposure .....	12
1.1.3.1 General population exposure .....	12
1.1.3.2 Occupational exposure .....	13
1.1.4 Effects on experimental animals .....	13
1.1.5 Clinical and epidemiological studies in man .....	15
1.1.6 Evaluation of health risks .....	17
1.1.7 Control measures .....	18
1.2 Recommendations for further studies .....	18
1.2.1 Analytical aspects .....	18
1.2.2 Sources and levels in the environment .....	19
1.2.3 Studies on experimental animals .....	19
1.2.4 Human studies .....	20
2. CRUDE OILS .....	21
2.1 Properties and analytical methods .....	21
2.1.1 Chemical composition and properties .....	21
2.1.2 Methods of sampling and analysis .....	23
2.1.2.1 Gases and vapours .....	24
2.1.2.2 Aerosols .....	27
2.2 Sources of environmental pollution .....	29
2.2.1 Natural occurrence .....	29
2.2.2 Man-made sources .....	29
2.2.2.1 Production .....	29
2.2.2.2 Uses .....	30
2.2.2.3 Disposal of waste .....	32
2.3 Toxicological effects of crude oils .....	32
2.3.1 Effects on experimental animals .....	33
2.3.2 Effects on man .....	33
3. PETROLEUM SOLVENTS .....	34
3.1 Properties and analytical methods .....	34
3.1.1 Chemical composition and properties .....	34
3.1.1.1 Special boiling point solvents (SBPs) .....	35
3.1.1.2 White spirits .....	35
3.1.1.3 High boiling aromatic solvents .....	35
3.1.2 Purity of petroleum solvents .....	38
3.1.3 Methods of sampling and analysis .....	38
3.2 Sources of environmental pollution .....	38
3.2.1 Natural occurrence .....	38
3.2.2 Man-made sources .....	38
3.2.2.1 Production .....	38
3.2.2.2 Uses .....	39

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
