

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organisation, or the World Health Organization.

Environmental Health Criteria 21

CHLORINE AND HYDROGEN CHLORIDE

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

INVENTARIO N. 24

World Health Organization
Geneva, 1982

CONTENTS

	Page
ENVIRONMENTAL HEALTH CRITERIA FOR CHLORINE AND HYDROGEN CHLORIDE	8
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER STUDIES	11
1.1 Summary	11
1.1.1 Sampling and analytical methods	11
1.1.2 Sources and pathways of exposure	11
1.1.3 Experimental animal studies on the effects of chlorine	12
1.1.4 Experimental animal studies on the effects of hydrogen chloride	15
1.1.5 Controlled, clinical, and epidemiological studies on the effects of chlorine	17
1.1.6 Controlled, clinical, and epidemiological studies on the effects of hydrogen chloride	19
1.1.7 Evaluation of health risks	20
1.2 Recommendations for further studies	20
1.2.1 Monitoring	20
1.2.2 Human exposure	20
1.2.3 Experimental animal studies	21
1.2.4 Controlled, clinical, and epidemiological studies	21
1.2.5 The significance of biological effects	21
2. PROPERTIES AND ANALYTICAL METHODS	22
2.1 Physical and chemical properties of chlorine and hydrogen chloride	22
2.2 Sampling and analytical methods	22
2.2.1 Chlorine	22
2.2.2 Hydrogen chloride	24
3. SOURCES OF CHLORINE AND HYDROGEN CHLORIDE IN THE ENVIRONMENT	26
3.1 Natural sources of chlorine and hydrogen chloride	26

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other relevant activities carried out by the IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
