Environmental Health Criteria 26

STYRENE

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

INVENTARIO N. 29

World Health Organization
Geneva, 1983

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides

INVENTARIO N. 29

CONTENTS

The **International Programme on Chemical Safety (IPCS)** is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.

ENVIRONMENTAL HEALTH CRITERIA FOR STYRENE	
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER STUDIES	11
1.1 Summary	11
1.1.1 Uses and sources of exposure	11
1.1.2 Chemobiokinetics, biotransformation and biological monitoring	11
1.1.3 Adverse health effects	12
1.1.3.1 Acute effects	12
1.1.3.2 Nervous system effects	12
1.1.3.3 Genotoxic effects	12
1.1.3.4 Carcinogenic effects	13
1.1.3.5 Effects on reproduction	13
1.2 Recommendations for further studies	13
2. PROPERTIES AND ANALYTICAL METHODS	15
2.1 Analytical procedures	16
2.1.1 Measurement of styrene in air	16
2.1.2 Measurement of styrene and styrene metabolites in biological samples	18
2.1.2.1 Exhaled air	18
2.1.2.2 Blood	18
2.1.2.3 Subcutaneous adipose tissue	18
2.1.2.4 Urine	19
3. SOURCES OF STYRENE IN THE ENVIRONMENT	20
3.1 Production of styrene	20
3.2 Uses	21
3.3 Main sources of environmental pollution	21
4. ENVIRONMENTAL EXPOSURE LEVELS	23
4.1 General environment	23
4.1.1 Ambient air	23
4.1.2 Water	23
4.1.3 Food	24
4.2 Working environment	24
4.2.1 Styrene and polystyrene manufacture	25
4.2.2 Reinforced plastics applications	25
4.2.3 Styrene-butadiene applications	27
4.2.4 Summary of occupational exposure	28
