

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organization, or the World Health Organization

## Environmental Health Criteria 28

# ACRYLONITRILE

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology

World Health Organization  
Geneva, 1983

CONTENTS

The **International Programme on Chemical Safety (IPCS)** is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.

<b>ENVIRONMENTAL HEALTH CRITERIA FOR ACRYLONITRILE</b>	
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER RESEARCH . . . . .	11
1.1 Summary . . . . .	11
1.1.1 Properties and analytical methods . . . . .	11
1.1.2 Sources of exposure . . . . .	11
1.1.3 Industrial and environmental levels of exposure . . . . .	11
1.1.4 Monitoring of acrylonitrile uptake . . . . .	12
1.1.5 Absorption, distribution, biotransformation, and elimination . . . . .	12
1.1.6 Effects on experimental animals . . . . .	12
1.1.7 Effects on man . . . . .	13
1.2 Recommendations for further research . . . . .	13
2. PROPERTIES AND ANALYTICAL METHODS . . . . .	15
2.1 Physical and chemical properties of acrylonitrile . . . . .	15
2.1.1 Physical properties . . . . .	15
2.1.2 Chemical properties . . . . .	15
2.2 Analytical methods . . . . .	17
2.2.1 Sampling methods . . . . .	17
2.2.2 Analytical methods for determining acrylonitrile . . . . .	20
2.2.2.1 Determination of acrylonitrile and its metabolites in biological materials . . . . .	24
3. SOURCES OF INDUSTRIAL AND ENVIRONMENTAL EXPOSURE TO ACRYLONITRILE . . . . .	26
3.1 Natural occurrence . . . . .	26
3.2 Industrial technology, production data, and projection . . . . .	26
3.3 Use patterns . . . . .	26
3.4 Disposal of wastes . . . . .	28
3.5 Accidental release . . . . .	29
3.6 Environmental persistence . . . . .	30
4. INDUSTRIAL AND ENVIRONMENTAL SOURCES AND LEVELS OF EXPOSURE . . . . .	31
4.1 Exposure of the general population . . . . .	31
