

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology
28. Acrylonitrile
29. 2,4-Dichlorophenoxyacetic acid (2,4-D)
30. Principles for Evaluating Health Risks to Progeny Associated with Exposure to Chemicals during Pregnancy

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organization, or the World Health Organization

Environmental Health Criteria 31

TETRACHLOROETHYLENE

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

World Health Organization
Geneva, 1984

CONTENTS

The **International Programme on Chemical Safety (IPCS)** is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.

PREFACE	7
1. SUMMARY	9
2. PROPERTIES AND ANALYTICAL METHODS	11
2.1 Chemical and physical properties of tetrachloroethylene	11
2.2 Analytical methods	12
3. SOURCES IN THE ENVIRONMENT, ENVIRONMENTAL TRANSPORT AND DISTRIBUTION	15
3.1 Natural occurrence	15
3.2 Production levels and processes, and uses	15
3.2.1 Production levels and processes	15
3.2.2 Uses	15
3.3 Occurrence and transport in the environment	15
3.3.1 Occurrence	15
3.3.2 Transport	16
4. ENVIRONMENTAL LEVELS AND EXPOSURES	17
4.1 Occupational exposure	17
4.2 General population exposure	17
5. CHEMIOBIOKINETICS AND METABOLISM	19
5.1 Absorption	19
5.1.1 Animal studies	19
5.1.2 Human studies	19
5.2 Distribution	19
5.2.1 Animal studies	19
5.2.2 Human studies	20
5.3 Metabolic transformation	20
5.3.1 Animal studies	20
5.3.2 Human studies	21
5.4 Excretion	21
5.4.1 Animal studies	21
5.4.2 Human studies	21
6. EFFECTS ON ORGANISMS IN THE ENVIRONMENT	23
