

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites, and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology
28. Acrylonitrile
29. 2,4-Dichlorophenoxyacetic Acid (2,4-D)
30. Principles for Evaluating Health Risks to Progeny Associated with Exposure to Chemicals during Pregnancy
31. Tetrachloroethylene
32. Methylene Chloride
33. Epichlorohydrin
34. Chlordane
35. Extremely Low Frequency (ELF) Fields
36. Fluorine and Fluorides
37. Aquatic (Marine and Freshwater) Biotoxins
38. Heptachlor
39. Paraquat and Diquat
40. Endosulfan
41. Quintozene
42. Tecnazene
43. Chlordecone
44. Mirex
45. Camphechlor
46. Guidelines for the Study of Genetic Effects in Human Populations
47. Summary Report on the Evaluation of Short-Term Tests for Carcinogens (Collaborative Study on *In Vitro* Tests)
48. Dimethyl Sulfate

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organisation, or the World Health Organization

## Environmental Health Criteria 49

# ACRYLAMIDE

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

World Health Organization  
Geneva, 1985

CONTENTS

	Page
ENVIRONMENTAL HEALTH CRITERIA FOR ACRYLAMIDE	
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER RESEARCH . . .	9
1.1 Summary . . . . .	9
1.1.1 Properties, uses, and analytical methods . . . . .	9
1.1.2 Environmental sources and environmental transport and distribution . . . . .	10
1.1.3 Environmental levels and exposures . . . . .	10
1.1.4 Metabolism of acrylamide . . . . .	11
1.1.5 Effects on man and animals . . . . .	12
1.1.6 Mutagenicity and carcinogenicity . . . . .	13
1.1.7 Teratogenicity and reproduction . . . . .	13
1.1.8 Dose-effect and dose-response relationships . . . . .	14
1.1.9 Evaluation of health risks for man . . . . .	14
1.2 Recommendations for further research . . . . .	16
1.2.1 Analysis . . . . .	16
1.2.2 Exposure . . . . .	16
1.2.3 Metabolism and indicators of exposure . . . . .	16
1.2.4 Effects . . . . .	16
2. PROPERTIES AND ANALYTICAL METHODS . . . . .	18
2.1 Identity . . . . .	18
2.2 Chemical and physical properties . . . . .	18
2.3 Sampling and analytical methods . . . . .	19
3. SOURCES IN THE ENVIRONMENT . . . . .	23
3.1 Production levels, processes, and uses . . . . .	23
3.1.1 World production . . . . .	23
3.1.2 Production processes . . . . .	23
3.1.3 Uses . . . . .	24
3.2 Release into the environment . . . . .	24
3.3 Disposal of wastes . . . . .	26
4. ENVIRONMENTAL TRANSPORT, DISTRIBUTION, AND TRANSFORMATION . . . . .	28
4.1 Transport in the environment . . . . .	28
4.2 Biomagnification and bioconcentration . . . . .	28
4.3 Transformation . . . . .	28

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organization, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
