

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organization, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.

ENVIRONMENTAL HEALTH CRITERIA FOR TRICHLOROETHYLENE	
1. SUMMARY AND RECOMMENDATIONS FOR FURTHER RESEARCH	11
1.1 Summary	11
1.1.1 Properties and analytical methods	11
1.1.2 Uses and sources of exposure	11
1.1.3 Industrial exposure	11
1.1.4 Environmental transport and distribution	12
1.1.5 Absorption, distribution, biotransformation, and elimination	12
1.1.6 Effects on experimental animals	13
1.1.7 Effects on man	13
1.2 Recommendations for further research	15
2. IDENTITY, PROPERTIES AND ANALYTICAL METHODS	17
2.1 Identity	17
2.2 Physical and chemical properties	18
2.2.1 Pure trichloroethylene	18
2.2.1.1 Chemical reactivity	18
2.2.1.2 Chemical degradation	18
2.2.1.3 Photochemical degradation	18
2.2.2 Commercial trichloroethylene	21
2.3 Analytical methods	22
2.3.1 Identification and purity assessment	22
2.3.1.1 Colorimetry tests	22
2.3.1.2 Infra-red spectroscopy	22
2.3.1.3 Gas-liquid chromatography	22
2.3.2 Determination in environmental media	26
2.3.2.1 Soil	26
2.3.2.2 Water	26
2.3.2.3 Air	26
2.3.2.4 Foodstuffs	26
2.3.3 Determination in human tissues and fluids	27
2.3.3.1 Trichloroethylene	27
2.3.3.2 Trichloroacetic acid	27
2.3.3.3 Trichloroethanol	28
2.3.3.4 Total trichloro derivatives	29
2.3.4 Sensitivity	29
