

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites, and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology
28. Acrylonitrile
29. 2,4-Dichlorophenoxyacetic Acid (2,4-D)
30. Principles for Evaluating Health Risks to Progeny Associated with Exposure to Chemicals during Pregnancy
31. Tetrachloroethylene
32. Methylene Chloride
33. Epichlorohydrin
34. Chloroethane
35. Extremely Low Frequency (ELF) Fields
36. Fluorine and Fluorides
37. Aquatic (Marine and Freshwater) Biotoxins
38. Heptachlor
39. Paraquat and Diquat
40. Endosulfan
41. Quintozene
42. Tecnazene
43. Chloroethane
44. Mirex
45. Camphechlor
46. Guidelines for the Study of Genetic Effects in Human Populations
47. Summary Report on the Evaluation of Short-Term Tests for Carcinogens (Collaborative Study on *In Vitro* Tests)
48. Dimethyl Sulfate
49. Acrylamide
50. Trichloroethylene

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organisation, or the World Health Organization

Environmental Health Criteria 51

GUIDE TO SHORT-TERM TESTS FOR DETECTING MUTAGENIC AND CARCINOGENIC CHEMICALS

Prepared for the IPCS by the International Commission for Protection Against Environmental Mutagens and Carcinogens

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

World Health Organization
Geneva, 1985

CONTENTS

	<u>Page</u>
GUIDE TO SHORT-TERM TESTS FOR DETECTING MUTAGENIC AND CARCINOGENIC CHEMICALS	
PREAMBLE	11
1. INTRODUCTION	13
2. DESCRIPTION OF WIDELY-ADOPTED PROCEDURES	24
2.1 Bacterial mutation assays	24
2.1.1 Principles and scientific basis of the assay	24
2.1.2 Relevance and limitations of the assay	26
2.1.3 The procedure	27
2.1.3.1 Outline of the basic procedure	27
2.1.3.2 Critical factors in the procedure	29
2.1.4 Presentation and interpretation of data	32
2.1.4.1 Data-processing and presentation	32
2.1.4.2 Interpretation of data in terms of positive and negative	33
2.1.4.3 Dealing with ambiguous results	33
2.1.5 Discussion	34
2.1.5.1 How the most critical factors identified above can influence the validity of the data	34
2.1.5.2 Interpretation of the results in terms of the intrinsic mutagenic activity of the test material	34
2.2 Genotoxicity studies using yeast cultures	34
2.2.1 Introduction	34
2.2.2 Genetic end-points	36
2.2.2.1 Point mutation	36
2.2.2.2 Recombination	38
2.2.2.3 Aneuploidy	42
2.2.3 Information required	47
2.2.4 Interpretation	47
2.2.4.1 Significance of positive results in yeast assays	47
2.2.4.2 Negative results in yeast assays	48
2.3 Unscheduled DNA synthesis in cultured mammalian cells	49
2.3.1 Introduction	49
2.3.2 Chemical exposure and UDS	51

The **International Programme on Chemical Safety (IPCS)** is a joint venture of the United Nations Environment Programme, the International Labour Organization, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
