

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites, and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology
28. Acrylonitrile
29. 2,4-Dichlorophenoxyacetic Acid (2,4-D)
30. Principles for Evaluating Health Risks to Progeny Associated with Exposure to Chemicals during Pregnancy
31. Tetrachloroethylene
32. Methylene Chloride
33. Epichlorohydrin
34. Chlordane
35. Extremely Low Frequency (ELF) Fields
36. Fluorine and Fluorides
37. Aquatic (Marine and Freshwater) Biotoxins
38. Heptachlor
39. Paraquat and Diquat
40. Endosulfan
41. Quinotozene
42. Tecnazene
43. Chlordecone
44. Mirex
45. Camphechlor
46. Guidelines for the Study of Genetic Effects in Human Populations
47. Summary Report on the Evaluation of Short-Term Tests for Carcinogens (Collaborative Study on *In Vitro* Tests)
48. Dimethyl Sulfate
49. Acrylamide
50. Trichloroethylene
51. Guide to Short-Term Tests for Detecting Mutagenic and Carcinogenic Chemicals (ICPEMC)
52. Toluene
53. Asbestos and Other Natural Mineral Fibres

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organisation, or the World Health Organization

Environmental Health Criteria 54

AMMONIA

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

World Health Organization
Geneva, 1986

CONTENTS

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organization, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.

ENVIRONMENTAL HEALTH CRITERIA FOR AMMONIA	
1. SUMMARY	11
1.1 Properties and analytical methods	11
1.2 Sources in the environment	11
1.3 Environmental transport, distribution and transformation	12
1.4 Environmental levels and human exposure	12
1.5 Kinetics and metabolism	13
1.5.1 Uptake and absorption	13
1.5.2 Distribution	13
1.5.3 Metabolic transformation	14
1.5.4 Excretion and turnover	14
1.5.5 Plant metabolism of ammonia	14
1.6 Effects on aquatic organisms	14
1.7 Effects on experimental animals and <u>in vitro</u> test systems	15
1.7.1 Single exposures	15
1.7.2 Short-term exposures	17
1.7.3 Skin and eye irritation; sensitization	17
1.7.4 Long-term exposure	17
1.7.5 Reproduction, embryotoxicity, and teratogenicity	18
1.7.6 Mutagenicity	18
1.7.7 Carcinogenicity	18
1.7.8 Mechanisms of toxicity	18
1.8 Effects on man	18
1.8.1 Organoleptic effects	18
1.8.2 Clinical, controlled human studies and accidental exposure	18
1.8.3 Endogenous ammonia	19
1.9 Evaluation of the health risks for man and effects on the environment	19
1.10 Conclusions	19
2. PROPERTIES AND ANALYTICAL METHODS	21
2.1 Physical and chemical properties of ammonia and ammonium compounds	21
2.1.1 Gaseous and anhydrous liquid ammonia	21
2.1.2 Aqueous solutions	21
2.1.3. Chemical reactions	23
2.1.4. Ammonium compounds	24
