PRINCIPLES FOR EVALUATING HEALTH RISKS FROM CHEMICALS DURING INFANCY AND EARLY CHILDHOOD: THE NEED FOR A SPECIAL APPROACH	
PREFACE . . . . .	9
SUMMARY OF THE REPORT . . . . .	11
SUMMARY OF RECOMMENDATIONS . . . . .	13
1. INTRODUCTION . . . . .	15
1.1 Objective . . . . .	15
1.2 Definitions . . . . .	15
1.2.1 Infant and young child . . . . .	15
1.2.2 Chemical . . . . .	15
1.3 Physiological basis for concern . . . . .	15
1.3.1 Small size and large surface area in relation to weight . . . . .	15
1.3.2 The higher metabolic rate and hence higher consumption of oxygen and intake of air per unit body weight in the infant compared with the adult . . . . .	16
1.3.3 Rapid growth . . . . .	16
1.3.4 Different body composition from adult . . . . .	19
1.3.5 Functional immaturity of the organs and systems of the body . . . . .	21
1.3.6 Breast milk, infant formulae, and water as sources of chemicals . . . . .	22
1.4 Applicability of data on experimental animals to human infants and young children . . . . .	22
1.4.1 Some similarities in growth and development between man and experimental animals . . . . .	23
1.4.2 Some differences in growth and development between man and experimental animals . . . . .	23
1.5 Conclusions . . . . .	25
2. PATHWAYS OF EXPOSURE . . . . .	26
2.1 Introduction . . . . .	26
2.2 The alimentary tract . . . . .	27
2.2.1 Milk . . . . .	27
2.2.1.1 Human milk . . . . .	27
2.2.1.2 Other types of milk . . . . .	28

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
