

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrites, Nitrites, and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part I
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology
28. Acrylonitrile
29. 2,4-Dichlorophenoxyacetic Acid (2,4-D)
30. Principles for Evaluating Health Risks to Progeny Associated with Exposure to Chemicals during Pregnancy
31. Tetrachloroethylene
32. Methylene Chloride
33. Epichlorohydrin
34. Chlordane
35. Extremely Low Frequency (ELF) Fields
36. Fluorides and Fluorine
37. Aquatic (Marine and Freshwater) Biotoxins
38. Heptachlor
39. Paraquat and Diquat
40. Endosulfan
41. Quintozene
42. Tecnazene
43. Chlordecone
44. Mirex
45. Camphechlor
46. Guidelines for the Study of Genetic Effects in Human Populations
47. Summary Report on the Evaluation of Short-Term Tests for Carcinogens (Collaborative Study on *In Vitro* Tests)
48. Dimethyl Sulfate
49. Acrylamide
50. Trichloroethylene
51. Guide to Short-Term Tests for Detecting Mutagenic and Carcinogenic Chemicals
52. Toluene
53. Asbestos and Other Natural Mineral Fibres
54. Ammonia
55. Ethylene Oxide
56. Propylene Oxide
57. Principles of Toxicokinetic Studies
58. Selenium
59. Principles for Evaluating Health Risks from Chemicals During Infancy and Early Childhood: The Need for a Special Approach

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organisation, or the World Health Organization

## Environmental Health Criteria 60

# PRINCIPLES AND METHODS FOR THE ASSESSMENT OF NEUROTOXICITY ASSOCIATED WITH EXPOSURE TO CHEMICALS

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization

World Health Organization

PRINCIPLES AND METHODS FOR THE ASSESSMENT OF NEUROTOXICITY ASSOCIATED WITH EXPOSURE TO CHEMICALS	
PREFACE . . . . .	11
1. INTRODUCTION . . . . .	13
1.1 The importance of studying the nervous system . . . . .	13
1.1.1 Methylmercury . . . . .	14
1.1.2 Carbon disulfide (CS <sub>2</sub> ) . . . . .	16
1.2 Need to establish a comprehensive strategy for neurotoxicity testing . . . . .	18
1.3 Scope of the book . . . . .	19
1.4 Purpose of the publication . . . . .	20
2. GENERAL PRINCIPLES FOR THE ASSESSMENT OF TOXIC EFFECTS OF CHEMICALS ON THE NERVOUS SYSTEM . . . . .	22
2.1 Factors to be considered in the design of neurotoxicity studies . . . . .	22
2.1.1 General considerations . . . . .	22
2.1.2 Objectives . . . . .	22
2.1.3 Choice of animals . . . . .	25
2.1.4 Dosing regimen . . . . .	27
2.1.5 Functional reserve and adaptation . . . . .	27
2.1.6 Other factors . . . . .	27
2.2 Statistical analysis . . . . .	28
2.2.1 Type I and Type II errors . . . . .	28
2.2.2 Selection of the appropriate statistical test(s) . . . . .	30
3. TEST METHODS IN BEHAVIOURAL TOXICOLOGY . . . . .	32
3.1 Introduction . . . . .	32
3.2 Classes of behaviour . . . . .	33
3.2.1 Respondent behaviour . . . . .	33
3.2.2 Operant behaviour . . . . .	36
3.3 Test methods . . . . .	38
3.3.1 General attributes of behavioural methods . . . . .	38
3.3.1.1 Sensitivity and specificity . . . . .	38
3.3.1.2 Validity . . . . .	38
3.3.1.3 Replicability . . . . .	39
3.3.1.4 Costs . . . . .	39

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
