

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites, and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part I
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology
28. Acrylonitrile
29. 2,4-Dichlorophenoxyacetic Acid (2,4-D)
30. Principles for Evaluating Health Risks to Progeny Associated with Exposure to Chemicals during Pregnancy
31. Tetrachloroethylene
32. Methylene Chloride
33. Epichlorohydrin
34. Chlordane
35. Extremely Low Frequency (ELF) Fields
36. Fluorides and Fluorine
37. Aquatic (Marine and Freshwater) Biotoxins
38. Heptachlor
39. Paraquat and Diquat
40. Endosulfan
41. Quintozene
42. Tecnazene
43. Chlordecone
44. Mirex
45. Camphochlor
46. Guidelines for the Study of Genetic Effects in Human Populations
47. Summary Report on the Evaluation of Short-Term Tests for Carcinogens (Collaborative Study on *In Vitro* Tests)
48. Dimethyl Sulfate
49. Acrylamide
50. Trichloroethylene
51. Guide to Short-Term Tests for Detecting Mutagenic and Carcinogenic Chemicals
52. Toluene
53. Asbestos and Other Natural Mineral Fibres
54. Ammonia
55. Ethylene Oxide
56. Propylene Oxide
57. Principles of Toxicokinetic Studies
58. Selenium
59. Principles for Evaluating Health Risks from Chemicals During Infancy and Early Childhood: The Need for a Special Approach
60. Principles for the Assessment of Neurobehavioural Toxicology
61. Chromium
62. 1,2-Dichloroethane
63. Organophosphorus Insecticides — A General Introduction
64. Carbamate Pesticides — A General Introduction
65. Butanols — Four Isomers
66. Kelevan
67. Tetradifon

Environmental Health Criteria 70

PRINCIPLES FOR THE SAFETY ASSESSMENT OF FOOD ADDITIVES AND CONTAMINANTS IN FOOD

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization in collaboration with the Food and Agriculture Organization of the United Nations

World Health Organization
Geneva, 1987

CONTENTS

PRINCIPLES FOR THE SAFETY ASSESSMENT OF FOOD ADDITIVES AND CONTAMINANTS IN FOOD

FOREWORD 11

PREFACE 12

1. INTRODUCTION 15

2. HISTORICAL BACKGROUND 18

2.1 Introduction 18

2.2 Periodic review 21

2.2.1 Concept of periodic review 21

2.2.2 Mechanism of periodic review 23

3. CRITERIA FOR TESTING AND EVALUATION 25

3.1 Criteria for testing requirements 25

3.1.1 Estimating exposure 26

3.1.2 Predicting toxicity from chemical structure 27

3.1.3 Other factors to consider when developing criteria 28

3.2 Priorities for testing and evaluation 29

3.3 Quality of data 30

4. CHEMICAL COMPOSITION AND THE DEVELOPMENT OF SPECIFICATIONS 32

4.1 Identity and purity 32

4.2 Reactions and fate of food additives and contaminants in food 33

4.3 Specifications 34

5. TEST PROCEDURES AND EVALUATION 39

5.1 End-points in experimental toxicity studies 39

5.1.1 Effects with functional manifestations 40

5.1.2 Non-neoplastic lesions with morphological manifestations 41

5.1.3 Neoplasms 42

5.1.4 Reproduction/developmental toxicity 46

5.1.5 *In vitro* studies 48

5.2 The use of metabolic and pharmacokinetic studies in safety assessment 50

The International Programme on Chemical Safety (IPCS) is a joint venture of the United Nations Environment Programme, the International Labour Organization, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
