

Other titles available in the ENVIRONMENTAL HEALTH CRITERIA series include:

1. Mercury
2. Polychlorinated Biphenyls and Terphenyls
3. Lead
4. Oxides of Nitrogen
5. Nitrates, Nitrites, and N-Nitroso Compounds
6. Principles and Methods for Evaluating the Toxicity of Chemicals, Part 1
7. Photochemical Oxidants
8. Sulfur Oxides and Suspended Particulate Matter
9. DDT and its Derivatives
10. Carbon Disulfide
11. Mycotoxins
12. Noise
13. Carbon Monoxide
14. Ultraviolet Radiation
15. Tin and Organotin Compounds
16. Radiofrequency and Microwaves
17. Manganese
18. Arsenic
19. Hydrogen Sulfide
20. Selected Petroleum Products
21. Chlorine and Hydrogen Chloride
22. Ultrasound
23. Lasers and Optical Radiation
24. Titanium
25. Selected Radionuclides
26. Styrene
27. Guidelines on Studies in Environmental Epidemiology
28. Acrylonitrile
29. 2,4-Dichlorophenoxyacetic Acid (2,4-D)
30. Principles for Evaluating Health Risks to Progeny Associated with Exposure to Chemicals during Pregnancy
31. Tetrachloroethylene
32. Methylene Chloride
33. Epichlorohydrin
34. Chlordane
35. Extremely Low Frequency (ELF) Fields
36. Fluorine and Fluorides
37. Aquatic (Marine and Freshwater) Biotoxins
38. Heptachlor
39. Paraquat and Diquat
40. Endosulfan
41. Quintozene
42. Tecnazene
43. Chlordecone
44. Mirex
45. Camphechlor
46. Guidelines for the Study of Genetic Effects in Human Populations
47. Summary Report on the Evaluation of Short-Term Tests for Carcinogens (Collaborative Study on *In Vitro* Tests)
48. Dimethyl Sulfate
49. Acrylamide
50. Trichloroethylene
51. Guide to Short-Term Tests for Detecting Mutagenic and Carcinogenic Chemicals
52. Toluene
53. Asbestos and Other Natural Mineral Fibres
54. Ammonia
55. Ethylene Oxide
56. Propylene Oxide
57. Principles of Toxicokinetic Studies
58. Selenium
59. Principles for Evaluating Health Risks from Chemicals During Infancy and Early Childhood: The Need for a Special Approach
60. Principles for the Assessment of Neurobehavioural Toxicology
61. Chromium
62. 1,2-Dichloroethane
63. Organophosphorus Insecticides — A General Introduction
64. Carbamate Pesticides — A General Introduction
65. Butanols — Four Isomers
66. Kelevan
67. Tetradifon

CONTENTS

	<u>Page</u>
PRINCIPLES OF STUDIES ON DISEASES OF SUSPECTED CHEMICAL ETIOLOGY AND THEIR PREVENTION	
INTRODUCTION	10
1. SUMMARY	13
2. DEFINITION OF THE PROBLEM	15
3. GENERAL APPROACHES IN THE INVESTIGATION OF DISEASES OF SUSPECTED CHEMICAL ETIOLOGY	20
4. DISEASE APPROACH: RECOGNITION AND DESCRIPTION OF A HEALTH PROBLEM	22
4.1 General background	22
4.2 Recognition of the index cases	23
4.3 Screening of populations for suspected cases	25
4.4 Case definition	25
4.5 Case identification	27
4.6 Importance of pathological studies	27
4.7 Reporting systems and case records	28
5. EPIDEMIOLOGICAL APPROACHES: SEARCH FOR DETERMINANTS	30
5.1 General background	30
5.2 Collection of information and criteria for obtaining specimens	31
5.3 In-depth study of cases	34
5.4 Evaluation of epidemiological data	35
6. TOXICOLOGICAL APPROACHES: STUDIES ON CHEMICALS POSSIBLY INVOLVED	37
6.1 Experimental animal studies	37
6.2 Analysis for toxic substances	38
6.3 Toxic chemical information data systems	39
7. PROBLEMS IN ESTABLISHING CHEMICAL ETIOLOGY	40
7.1 Causation in human disease	40
7.2 Consideration of a chemical etiology	42
7.3 Temporal relationships	44

The **International Programme on Chemical Safety (IPCS)** is a joint venture of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization. The main objective of the IPCS is to carry out and disseminate evaluations of the effects of chemicals on human health and the quality of the environment. Supporting activities include the development of epidemiological, experimental laboratory, and risk-assessment methods that could produce internationally comparable results, and the development of manpower in the field of toxicology. Other activities carried out by IPCS include the development of know-how for coping with chemical accidents, coordination of laboratory testing and epidemiological studies, and promotion of research on the mechanisms of the biological action of chemicals.
